FRONTEND
DEVELOPER

EXPIRIENCE

- Front-end Developer
  Augment
  2022 - 2023

  As a Front-end Developer (Wordpress), were responsible for developing and maintaining visually appealing and user-friendly website layouts using HTML, CSS, and JavaScript. This included customizing Wordpress themes and plugins using PHP and APIs. Worked closely with project management and design teams to meet client requirements, conducted quality assurance checks, and ensured web accessibility standards were met.

- Front-end Developer
  HR Vision
  2022 - 2022

  During my tenure as a Front-end Developer (Wordpress) in company, main role was to create and maintain the front-end of websites on the Wordpress platform, ensuring that they were visually appealing, user-friendly, and responsive. You achieved this by using your skills in HTML, CSS, and JavaScript to develop website layouts, and customizing Wordpress themes and plugins using PHP and Wordpress APIs.
